

AutoTune® Advanced

Perfectly Tuned. Still Human.

Rebuilt from the algorithm up, AutoTune Advanced delivers our most natural and accurate pitch correction yet, with the all-new **DVA™** (patent pending) engine preserving the vibrato and character that makes vocals feel alive. It's everything you need to tune transparently or tune hard and still sound like a human.

Available 9.24.26

Product highlights

- **Refined AutoTune® Auto-Mode pitch correction engine**
- **New DVA™ vibrato detection & preservation algorithm**
- **New Ultra-fast LIVE Latency Mode**
- **New Vibrato FX & Real-time visualizer**
- **Transpose & Formant Designer**
- **Redesigned scale editing workflow**
- **78-note Visual Keyboard with MIDI Perform**
- **AutoKey 2 compatibility**

Controls that matter most

- **AutoTune® pitch engine:** tuning now sounds cleaner and more accurate than ever before.
- **DVA™ Vibrato Engine:** preserve the singer's natural vibrato through correction, then cut or boost it by ear.
- **Live Latency Mode:** fastest response time available. Ideal for live performance and monitoring.
- **Redesigned Formant Designer:** transpose moves the pitch and Formant adjusts the apparent size of the singer, both across ±12 semitones.
- **Redesigned scale editing workflow:** edit by note on a 78-note keyboard, bypassing or re-tuning individual notes.

Who it's for:

Professional Producer

Mixing Engineer

Live / Stage Engineer
