Santa Cruz, CA - [Antares Audio Technologies](#), creators of Auto-Tune®, the GRAMMY®-award winning software and the industry standard for vocal production, announce the release of **Auto-Tune Vocal Compressor**. By combining the industry's most popular vocal compressor styles and controls into one powerful plug-in, **Auto-Tune Vocal Compressor** is the ultimate vocal compressor.

Auto-Tune Compressor supports the stacking of two fully featured and tweakable compressors from four of the most popular styles (FET, Opto A, Opto B, and Modern) in a series to create the modern vocal sounds of today's music.

Using advanced machine learning technology, **Auto-Tune Vocal Compressor** analyzes a track and recommends the optimum starting point and compression levels to quickly get the sound you want. Finding the best compression settings is now faster and easier than ever.

Auto-Tune Vocal Compressor also comes with compelling artist presets covering a wide range of vocal styles and moods to help jumpstart your creativity and make it easy to experiment with new ideas. For added personality, lean into the built-in Warm feature and apply the cozy vibe of tube saturation and harmonics to vocals across one or both compressors.

Steve Berkley, CEO of Antares Audio Technologies, says, "We're very excited to release **Auto-Tune Vocal Compressor**, delivering another essential tool for today's most successful professionals and tomorrow's most promising creators. By combining the only dual-stage vocal compressor plug-in in the world with the power of advanced machine learning, we've created a must-have tool for anyone working with vocals, whether you're experienced or a beginner."

About Antares Audio Technologies

Antares Audio Technologies is the creator of Auto-Tune®, the GRAMMY®-award winning vocal production software. As “the sound of the 21st century,” Auto-Tune has revolutionized the music industry and is used in the vast majority of The Billboard Hot 100 tracks. In 2020, Antares released Auto-Tune Unlimited, one of the music industry’s fastest growing and most influential subscription offerings. Antares’ mission is to be the global leader in vocal processing for music, podcasting, gaming, social, and other spoken word applications. The company was founded in 1997 and remains at the cutting edge of technology and culture, with over a million copies of its software sold to date.
