

# **Auto-Tune® developer Antares Audio Technologies launches Auto-Tune Vocal EQ**

*Equalize your vocal tracks with the power of Auto-Tune pitch technology*

**Go Live Date:** 6/2/22

**Contact:** [marketing@antarestech.com](mailto:marketing@antarestech.com)

**Santa Cruz, CA** - [Antares Audio Technologies](https://www.antaresaudio.com), creators of Auto-Tune®, continue to lead in the development of advanced vocal production software with the release of Auto-Tune Vocal EQ, the only dynamic equalizer with patented Auto-Tune pitch tracking technology built in. Auto-Tune Vocal EQ is the fastest and easiest way to EQ vocals as well as instruments and other audio tracks.

Engineered specifically for vocals, Auto-Tune Vocal EQ allows you to isolate and accentuate precise frequencies to make vocals sound smoother and shine in the mix. Powerful dynamic nodes combined with proprietary Auto-Tune pitch metering makes it easy to find the optimum place in the frequency spectrum to work in for any vocalist. Auto-Tune Vocal EQ marks another valuable addition to Auto-Tune Unlimited, the ultimate vocal production suite.

Key Auto-Tune Vocal EQ Features:

## **Pitch Metering**

Watch a vocalist's pitch move across the frequency spectrum in real-time to visualize range and thresholds.

## **Pitch Tracking**

Lock an EQ band to a vocalist's pitch to focus on fundamental pitch or harmonics.

## **Vocal Learning**

Automatically determine input type and highlight the average vocal range (alto, tenor, soprano) for a quick start to EQing.

Auto-Tune Vocal EQ joins the recent additions of Auto-Tune Slice, Auto-Tune Vocoder, and Auto-Tune SoundSoap to the Auto-Tune Unlimited subscription bundle.

Steve Berkley, CEO of Antares Audio Technologies, says that, "EQ is a foundational element of every serious vocal production, whether in the home studio or world class engineering facility. Auto-Tune Vocal EQ strengthens our premiere vocal production suite with a powerful EQ that any Auto-Tune Unlimited subscriber can now access."

He goes on to say, “Auto-Tune Vocal EQ is another example of our long-term focus on building a robust, feature-rich vocal production experience for audio professionals around the world. With the release of Auto-Tune Vocal EQ, we continue to innovate as an audio technology leader and demonstrate our dedication to the creative culture we love and respect.”

Auto-Tune Vocal EQ comes complete with a range of powerful tools to give you an extensive range of control over every aspect of a track to get the right mix every time.

- 6 Full Parametric Bands
- Low-Pass and High-Pass Filters
- Air Band for adding a smooth high-end presence
- Tilt EQ Filter to balance the high and low end of the spectrum
- Spectrum Analyzer
- External Sidechain for adding dynamic filters
- Band/Solo Mode
- Dry/Wet

Auto-Tune Vocal EQ is available exclusively in [Auto-Tune Unlimited](#), the premium subscription service that includes every current edition of Auto-Tune, Auto-Tune Slice, Auto-Tune SoundSoap, Auto-Tune Vocoder, and 11 more essential vocal production plug-ins. Auto-Tune Unlimited also includes free automatic updates for included plug-ins, free access to select future plug-ins from Antares, and free video tutorials in the Auto-Tune Vocal Production Academy.

**Current Auto-Tune Unlimited subscribers have immediate access to Auto-Tune Vocal EQ at no extra cost.** New subscribers can access Auto-Tune Unlimited for \$24.99 paid monthly, or \$14.58 a month with paid annual subscription. A free 14-day trial is available to everyone, regardless of previous trials or subscriptions.
